

**ASR Suspension 03-11-2010:**

We purchased a shock filling machine from DO Engineering in May 2010 and I am delighted to say how impressed I am with the machines capabilities along with the advise and the companies professional aptitude.

We have operated our Suspension business here in Australia for nearly 20 years and this machine is one of the best pieces of equipment we have purchased in years. The machine is very easy to use with almost every shock type and we have had nothing but praise for how it works.

We are servicing shocks everyday so time and accuracy is of importance to us and the amount of time saved is massive and best of all – **No Air** trapped in the shocks to cause problems.

I would thoroughly recommend this product to other suspension tuners and repair technicians as it truly is a great unit and money well spent.
